

SSBCI QUALIFICATIONS

How members become eligible

Members must be diagnosed with one or more of the eligible chronic conditions and meet CMS's three-prong eligibility criteria:

Diagnosed with one or more qualifying, eligible chronic conditions

At high risk of hospitalizations or other adverse health outcomes

In need of intensive care coordination

While members may look to you for answers about their eligibility status, brokers cannot assess or verify whether a member meets the eligibility criteria.

Questions?

Contact your health plan for more information about benefits and eligibility requirements.
